to improve in 'reflexos de categoria' - to see which of the result is the winner of the process

you always have to link supplier - brand - category
you don't have a rule that relates

'suppliers' to 'category'

to you've to ~~to~~ fill in the link
manually supplier by supplier

adam bonwith

equipo de España como daniel, javier, sauer,

daniel forrester

acall, roberto garcia

we can ~~test~~ sync the production env dat and
the staging env data and then adam
can have access to the staging env
of the categorator.

to lo mas pto q queda por hacer
